

MOM — Omaxe: Perfo Processing, 9th August, 2026

Discussed with Kapil

Scope — Kapil's work on Perfo processing, covering interest waiver, assured return and its calculations from the term sheet, refund adjustment via affidavit processing, and dealer commission and invoicing.

Points discussed -

- **No. of cases** — closed, open and pending, and **pending on whose head**
- **Project wise, region wise** and overall views
- **Date wise** view
- **TAT breaches**, and the amount of breach in days
- **Interest amount input**
- **Report download with attachment**
- Region wise / project wise **amount, waiver amount and discount**
- **Drill down** — overall > region > project > date
- **TAT breaches**
- **Project wise policy doc** — including interest rates, RERA and payment plan
- **CRM reverts** in case of any findings based on policy
- **Approved / rejected** after checks and balances
- **Reduction rights** are there, but **increase rights are not** there
- Where a **Perfo issue** is found, rights currently allow the case to be sent back only to the sender
 - User wants **forwarding rights** to the id
 - **Mail builder** based on the observation, so that the information can be shared with the users
- **Case closure mail** and post approval analysis
- Approval should be **on the go on phone** — preferred; print is not preferred, **paperless is the need**
- User wants a **Gmail like interface** — multi select, click, and a detailed view appears to analyse and check
- **Interest, penalty**
- **Input type** — Excel with attachment

Product capabilities to be built -

- **Case tracking and dashboard -**
 - Case status — closed / open / pending, with pendency mapped to the owner it is pending on
 - Drill down — overall > region > project > date
 - Project wise, region wise, date wise and overall views

- **TAT monitoring -**
 - TAT breach tracking, with the extent of breach in days
- **Reporting -**
 - Region wise / project wise amount, waiver amount and discount
 - Report download with attachments
 - Post approval analysis
- **Calculations and inputs -**
 - Interest amount input
 - Interest and penalty computation
 - Assured return calculation from the term sheet
 - Input via Excel with attachment
- **Policy and controls -**
 - Project wise policy document — interest rates, RERA, payment plan
 - Validation of cases against the policy, with CRM revert on findings
 - Approve / reject after checks and balances
 - Rights — reduction allowed, increase not allowed
- **Workflow and communication -**
 - Forwarding rights to another id, in addition to the current send back to sender
 - Mail builder driven by the observation recorded on the case
 - Case closure mail
- **User experience -**
 - Approval on the go on mobile; paperless, no print
 - Gmail like case list — multi select, click through to a detailed view for analysis
